Indoors was founded in 2012 with the purpose of creating a collection of brilliantly designed, timeless pieces.

We strive to design and select products that have something special, unique. We believe in the ability of an object to transform spaces.

Silla Claudio

Claudio chair plays with the arch as an element of repetition. It brings an architectural look to domestic scale. A reinterpretation of the classic semi-circular arch in a structure made out of thin steel planes.

Silla Claudia

Claudia is the small version of the Claudio chair. By reducing its scale, we get a handier and more versatile object, with a surprising playful look.

Mesa Claudio

The Claudio side table completes the family. Its design and size makes it perfect for changeable spaces. Light but steady, it fulfills many functions in the living areas.

Manolito

**Manolito is simple and robust.
It is an object without a specific function.
A stool, a nightstand or a step to reach
higher areas with more ease. It comes
in two sizes and two finishes.**

by Marc Morro

Espiga

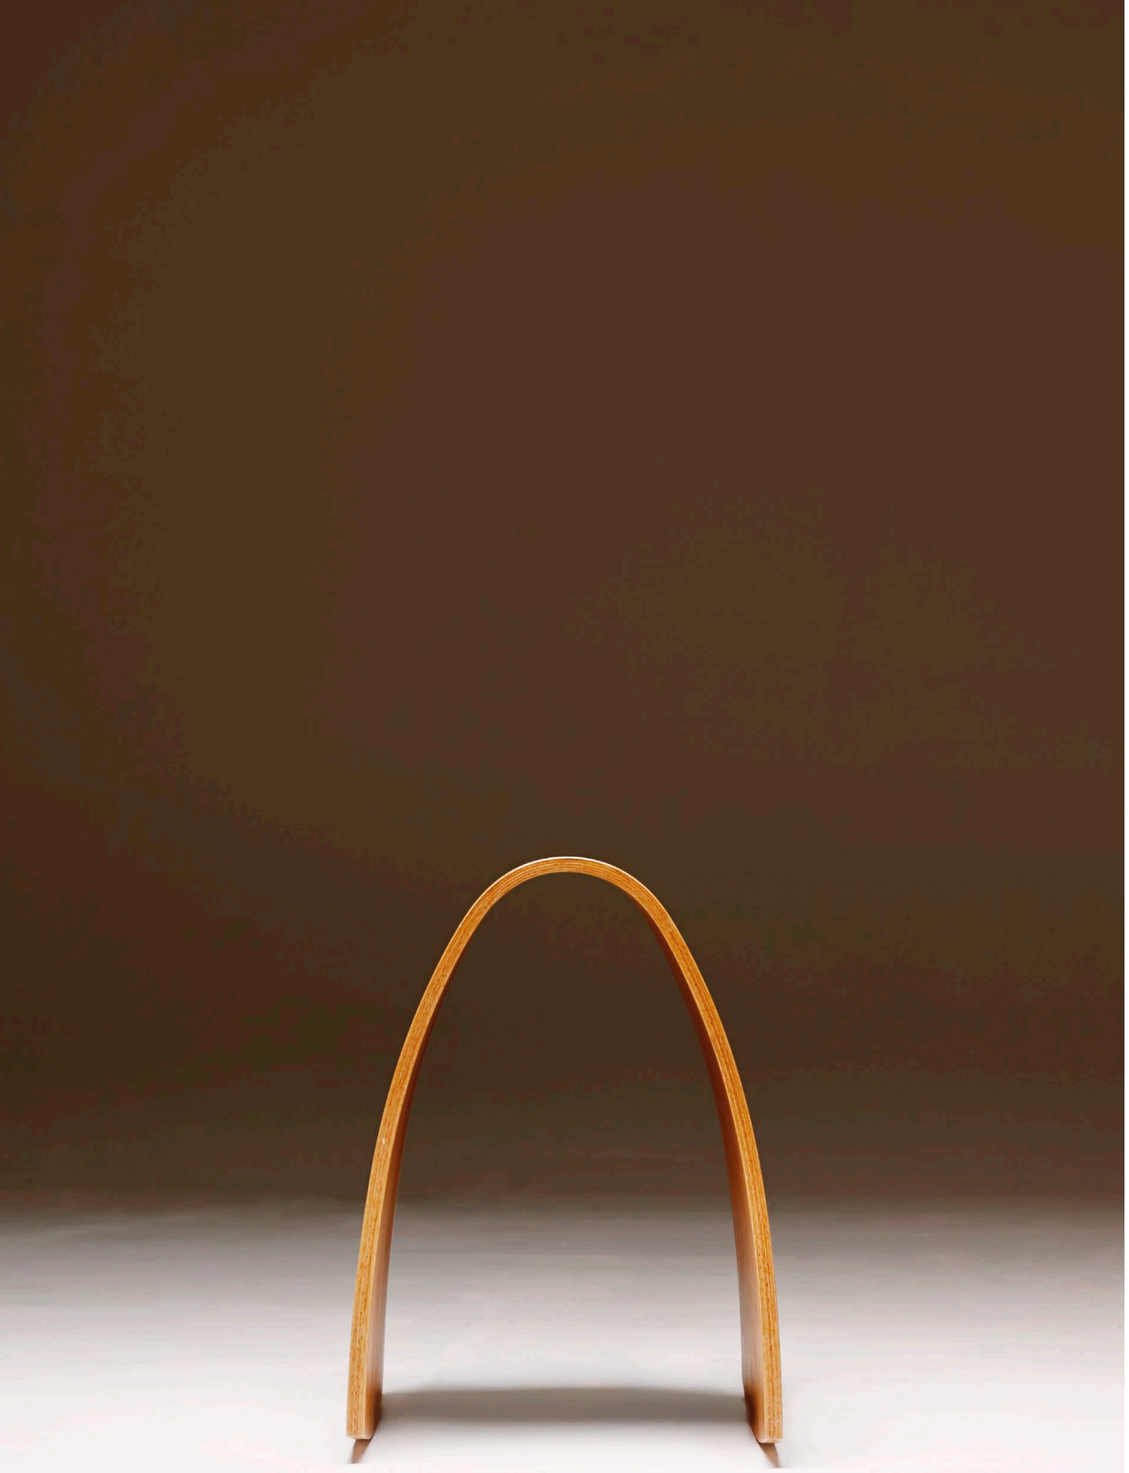
Espiga is a suggestive coat stand. Inspired by nature, it plays with tension. A ball pushes the strips down until they open, creating an image that resembles a sheaf of wheat.

by Gonzalo Milà & Luis Victory

Balensiya

Balensiya is a seat that offers different uses. Its attractive shape and its rocking movement echoes a toy that invites people to use it in their own way.

by Gonzalo Milà & Juan Carlos Inés



Triple

The dialog between the materials is clear and transparent, making Triple a unique folding screen. The design reveals how it works. It is hard to think of a more honest object.

by Gonzalo Milà

Troncocono

Troncocono is a collection of high-quality knobs. Each one of them tells a story of technology and tradition. Tronconono comes in three sizes and five different finishes.
